PYTHON FULL STACK DEVELOPER

Python Full Stack Developer with hands-on experience in building scalable web applications using Django, Django REST Framework, and React. Skilled in REST API development, database integration, and secure authentication. Passionate about writing clean, maintainable code and delivering efficient full-stack solutions.

EXPERIENCE

Application Support Engineer <i>Bajaj Allianz Life Insurance, Viman Nagar, Pune</i>	Jan 2026
• Provided L1/L2 application support for insurance web applications by troubleshooting functional and technical issues, resolving support tickets and maintaining service continuity. • Performed incident analysis, root cause investigation and issue replication to identify defects and support faster resolution of recurring production issues. • Worked with databases and internal support tools to validate customer data, investigate quotation mapping issues and assist in backend issue resolution. • Supported retrieval link generation workflows and handled validation of policy-related records, improving support response efficiency. • Monitored application behavior, analyzed logs and participated in defect tracking, escalation and incident reporting activities. • Assisted in testing fixes before deployment and contributed to reducing manual effort by identifying automation opportunities in repetitive support workflows. • Documented issues, troubleshooting steps and resolutions to support knowledge sharing and improve support processes.	
Python Developer Trainee <i>Kiran Academy, Karvenagar, Pune</i>	Jul 2025 – Dec 2025 6 Months
• Completed intensive hands-on training in Python, Object-Oriented Programming, SQL, Django and REST API development through practical project implementation. • Developed mini full-stack applications using Python and Django, implementing CRUD operations, authentication modules and backend business logic. • Designed and tested RESTful APIs, worked on request handling, validations, debugging and secure API development practices. • Worked with MySQL for schema design, query optimization, relational data handling and database-driven application development. • Built and integrated backend modules with frontend components while gaining exposure to full-stack workflows and deployment basics. • Applied debugging and problem-solving techniques to improve code quality, optimize performance and resolve functional issues. • Worked on project assignments involving API integration, user authentication, data processing and modular code development. • Gained practical exposure to version control, collaborative development workflows and software engineering best practices.	

TECHNICAL SKILLS

Programming	: Python, JavaScript, SQL, Object-Oriented Programming(OOP)
Backend	: Django, Django REST Framework, FastAPI, REST API Design, JWT Authentication
Frontend	: HTML5, CSS3, React (Basics)
Databases	: MySQL, MongoDB, Database Design
AI & Automation	: ML, LLM, RAG Basics, Vector Databases, GitHub Copilot, ChatGPT, Claude, Log Analysis
Tools	: Git, GitHub, Postman, Linux
Cloud	: AWS (Basic), API Deployment, CICD Pipelines
Soft Skills	: Problem Solving, Communication, Team Collaboration, Adaptability

EDUCATION

P. R. Pote Patil College of Engineering & Management <i>B.E. Artificial Intelligence and Data Science CGPA: 8.27/10</i>	Amravati, India 2025
Shreeyash College of Engineering and Technology <i>Diploma in Computer Science 82%</i>	Chhatrapati Sambhajnagar, India 2022

PROJECTS

Job Application Tracking System	<i>React.js, Django, MySQL</i>	2026
- Developed a full-stack web application to manage job applications, interview stages and recruiter responses through a centralized dashboard. - Designed and implemented RESTful APIs using Django REST Framework for authentication, CRUD operations and job workflow management. - Built a responsive frontend in React.js with dynamic state management and seamless backend API integration. - Implemented features such as application status tracking, interview scheduling and deadline monitoring. - Optimized MySQL queries and structured relational data models for efficient record management. - Applied secure authentication, input validation and modular code design for scalable application development.		
Food Connect – Food Donation Platform	<i>HTML, CSS, JavaScript, Node.js, Firebase</i>	2024
- Built a full-stack donation platform connecting food donors with individuals and organizations in need. - Developed end-to-end donation workflows with Firebase for real-time data storage and user management. - Designed a responsive user interface ensuring smooth cross-device experience and intuitive navigation. - Integrated REST APIs for seamless frontend-backend communication and dynamic data handling. - Implemented donor request management, data validation and workflow logic for efficient coordination. - Improved usability through structured design, interactive components and scalable application architecture.		

CERTIFICATIONS

Python for Data Science Certification – NPTEL, IIT Madras Covered Python programming, NumPy, Pandas, data visualization and machine learning fundamentals.	2024
AWS Academy Cloud Foundations – Amazon Web Services Learned cloud computing concepts, AWS core services, security and deployment fundamentals.	2024
Python Full Stack Development Certification – Kiran Academy Trained in Python, Django, REST APIs, SQL and full-stack application development.	2025

AWARDS & ACHIEVEMENTS

- Participated in coding contests and secured competitive rankings through problem-solving challenges. - Presented projects at college project exhibitions, showcasing innovative software solutions and technical implementation. - Contributed to planning and event management during college fests, demonstrating leadership and team coordination skills. - Recognized for active involvement in technical and extracurricular activities throughout academic journey.
