PROFILE SUMMARY

Generative AI and Python Full Stack Developer with hands-on experience in FastAPI, Django, REST APIs, LLMs, RAG, LangChain, and vector databases. Skilled in backend development, database management, and building scalable AI-powered applications

EDUCATION

P. R. Pote Patil College of Engineering & Management <i>Bachelor of Engineering in Artificial Intelligence and Data Science — CGPA: 8.27/10</i> Shreeyash College of Engineering and Technology <i>Diploma in Computer Science — Percentage: 82%</i>	Amravati, Maharashtra 2021 – 2025 Chhatrapati Sambhajinagar, Maharashtra 2019 – 2022
---	---

EXPERIENCE

Python Developer Trainee <i>Bajaj Life Insurance</i>	Jan 2026 Viman Nagar, Pune
- Completed intensive hands-on training in Python, Object-Oriented Programming, SQL, Django, and REST API development through practical project implementation. - Developed mini full-stack applications using Python and Django, implementing CRUD operations, authentication modules, and backend business logic. - Designed and tested RESTful APIs, worked on request handling, validations, debugging, and secure API development practices. - Worked with MySQL for schema design, query optimization, relational data handling, and database-driven application development. - Collaborated with mentors and team members to develop scalable backend solutions and improve application performance. - Applied software development best practices including version control, code reviews, testing, and debugging techniques.	

PROJECTS

AI Document Assistant using RAG <i>Python, FastAPI, LangChain, OpenAI/Gemini</i>	2026
- Developed a Retrieval-Augmented Generation (RAG) application that enables users to upload PDF documents and ask questions in natural language. - Implemented document parsing, chunking, embedding generation, and vector storage using ChromaDB. - Integrated Large Language Models to generate context-aware responses from retrieved document content. - Built scalable backend APIs using FastAPI and developed an interactive Streamlit user interface. - Improved information retrieval accuracy through semantic search and vector similarity matching.	
Portfolio Website with AI Chatbot <i>Django, FastAPI, React, OpenAI API, HTML, CSS, JavaScript</i>	2026
- Designed and developed a modern portfolio website using Glassmorphism and Bento Grid layouts. - Created RESTful APIs using Django and FastAPI for seamless frontend-backend communication. - Integrated an AI-powered chatbot using LLM APIs to answer visitor queries regarding projects - Implemented responsive design, email notifications, and logging functionality. - Optimized application performance across desktop, tablet, and mobile devices.	

TECHNICAL SKILLS

Programming Languages: Python, SQL, Object-Oriented Programming (OOP)
Backend Technologies: FastAPI, Django, Django REST Framework (DRF), REST APIs
Generative AI: Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), LangChain, LangGraph
AI/ML: Machine Learning, Natural Language Processing (NLP), Scikit-learn, PyTorch, Transformers
Databases: MySQL, ChromaDB, FAISS, Vector Databases
Cloud & DevOps: AWS Cloud Foundations, API Deployment, CI/CD Basics
